DEPARTMENT OF FINANCE AND COMMERCE.

NOTIFICATIONS.

Fort William, the 5th January 1883.

No. 57.

In exercise of the powers conferred by section 16 of the Indian Coinage

Act, 1870, and in supersession of the orders noted on the margin, the Governor General in Council is pleased to author-

ise the undermentioned officers to cut or break coin under that section:—

1. Every officer in charge of a District Treasury.
2. Every Assistant Collector, Deputy Collector, Assistant Commissioner, or Extra Assistant Commissioner in charge of a Sub-Treasury.
3. Every Commissioner, Deputy or Assistant Commissioner of the Department of Paper Currency.
4. The Mint Masters, Calcutta and Bombay.
5. The Secretary and Treasurer of each of the Presidency Banks, and every Agent in charge of a branch of any of the said Banks.

6. The Secretary, Manager, or other principal officer of the several offices and agencies in India of each of the following Banks :—
Agra Bank, Limited; Chartered Mercantile Bank; Chartered Bank of India; Comptoir D'Escompte de Paris; Delhi and London Bank, Limited; National Bank of India, Limited; Oriental Bank Corporation; Alliance Bank of Simla, Limited; Simla Bank Corporation, Limited.
7. The Chairman, Vice-Chairman, or the Secretary of the Calcutta Port Improvement Commissioners, Bombay Port Trustees, Rangoon Port Commissioners.
8. The Chairman, Vice-Chairman, President, Vice-President, or Secretary of the Presidency Municipalities.
9. And any officer of any other Municipality authorised by the Local Government or Administration.

And in exercise of the powers conferred by section 28 of the same Act, the Governor General in Council is pleased to prescribe the following rules :—

1. When any silver coin purporting to be coined and issued under the authority of the Government of India is tendered to any of the officers authorised by this Notification to act under section

Extract from Act No. XXIII of 1870—India.

*16. When any silver coin purporting to be coined and issued under the authority of the Government of India is tendered to any officer authorised by the Governor General in Council or the Local Government to act under this section, who has reason to believe it to have lost, by reasonable wearing, more than two per cent. in weight, or to be counterfeit, or to have been reduced in weight otherwise than by reasonable wearing, or to be called in by any proclamation, he may, by himself or another, (subject to the rules which the Governor General in Council prescribes in this behalf), cut or break such coin.

16* of the Indian Coinage Act, 1870, who has reason to believe it to be counterfeit, or to have been reduced in weight otherwise than by reasonable wearing, he shall cut or break such coin, and, under section 16 of the said Act, return the pieces to the person tendering the coin. In cutting or breaking coins, officers

should avoid completely dividing them, as it is often convenient to identify the parts of a particular coin. Such identification becomes impossible if the pieces are wholly separated. Care should, however, be taken that the destruction is complete.

2. When any rupee or half-rupee purporting to be coined and issued under the authority of the Government of India is tendered to any such officer, who has reason to believe it to have lost by reasonable wearing more than two per cent. in weight, he shall cut or break such coin, and, at the option of the person tendering the coin, return to him the pieces, or retain them and give credit for them at the rate of one rupee for one hundred and eighty grains troy weight.

3. A quarter-rupee or an eighth of a rupee tendered to such an officer

Extract from Act No. XXIII of 1870—India.

† 13. The said rupee and half-rupee shall be a legal tender in payment or Rupees and half-rupees a legal tender on account :

Provided that the coin has not lost more than two per cent. in weight :
Provided also that it has not been clipped or filed, or defaced or diminished, otherwise than by use.

The quarter-rupee and eighth of a rupee shall be legal tender only for the fractions of a rupee, subject to the second proviso contained in this section.

must, under section 13† of the Act, be accepted as legal tender for a fraction of a rupee, even though it have lost, by reasonable wearing, more than two per cent. in weight.

4. If, by reason of the obliteration of the device upon it, or for any other cause, any quarter-rupee or eighth of a rupee coined and issued after the 1st September 1835 that shall come into the possession of such an officer, shall appear to him to be unfit for further circulation, it shall not be cut or broken, but shall, whatever be its weight, be withdrawn from circulation and dealt with in the manner prescribed in Rules 5 and 6. But quarter-

rupees and eighths of a rupee shall not be withdrawn from circulation, if they appear to be otherwise fit to circulate, only because they have lost by reasonable wearing more than two per cent. in weight. Such coins, if coined and issued before 1st September 1835, must, however, be dealt with under section 16 of the Act.

5. In the case of coin tendered to officers of Government, the pieces of coin cut or broken and received under Rule 2, and the coin withdrawn from circulation under Rule 4, shall be sent, by the first convenient opportunity, to the Master of the Mint at Bombay or Calcutta or any principal treasury appointed by the local Accountant General to receive them for remittance to the Mint. Meanwhile, the actual amount at which the cut or broken pieces have been received and the nominal value of the coin withdrawn shall be entered in the statement of the cash balance of the officer who has received them as "uncurrent coin." Upon their receipt at the Mint, the Master of the Mint shall give credit for them at the rate mentioned in Rule 2, in the case of coin cut or broken, and at the nominal value in the case of coin withdrawn under Rule 4, and any loss incurred in their re-coinage shall be a charge of the Mint.

6. If the coin be cut or broken and received under these rules by any of the officers enumerated under headings 5 to 9 above, the pieces should be sent to the nearest Government Treasury (and in Presidency Towns to the Reserve Treasury) where the actual sum paid for them and the nominal value of the coin withdrawn shall be paid, and thereafter the pieces will be dealt with in the manner prescribed in Rule 5.

These rules apply to all silver coin of the same weight and value as British Indian Currency, coined by the Government of India on behalf of the Government of Portuguese India, or coined under the Native Coinage Act, IX of 1876, on behalf of Native States. They do not affect the orders contained in the Resolution of the Government of India in the Financial Department, No. 2432, dated 17th August 1881, under which, for the present, all genuine coin which has not been diminished by fraudulent means or has been diminished only by what are ordinarily known as shroff marks, shall be received at its nominal value; accordingly, in so far as regards such coin, the second rule of those now prescribed is suspended, except that coin which has been reduced more than two per cent. in weight by reasonable wearing shall be cut or broken as heretofore, although it be received at full value.

For testing rupees and half rupees under these rules, minimum weights, 176.4 and 88.2 grains troy respectively, shall be obtainable on application through the Comptroller General or the Accountant General, Bombay, as the case may be, to the Mint Masters at Calcutta and Bombay. These weights being already two per cent. below the standard weight for rupees and half rupees respectively show the exact weight below which the coin has to be destroyed. The weights will be supplied in all cases at Government expense, but as the scales ordinarily used by native jewellers are sufficient for these tests, scales will not be supplied by the Mint Masters.

ORDERED, that this Notification be published in the *Gazette of India* for general information, and that it be communicated to the several Local Governments and Administrations and the Comptroller General for information.

OBSERVATIONS.—In consequence of an application having been received from the Bombay Steam Soap and Candle Works Company, praying for the remission of the duty on the salt used by it in the manufacture of soap, the question of issuing salt, free of duty, for the manufacture of soap and alkali has recently engaged the attention of the Government of India. In the circular letter of the 23rd February 1882, read in the preamble, the Government of India expressed its opinion that the remission of duty on salt used for industrial and agricultural purposes was desirable in itself if it could be allowed without danger to the revenue, and observed that various methods of denaturalising salt had from time to time been suggested, but that hitherto no satisfactory process which exactly met the requirements of the case had been discovered. It was accordingly proposed in view to the issue of duty-free salt to soap manufactories, that a preventive establishment should be placed at the works to see that the free salt is actually mixed with the prepared lye, the cost of the establishment being borne by the manufacturers. It was at the same time suggested that it should be first ascertained, by actual experiment, whether the salt after being mixed with the lye could be separated from it and again rendered fit for human consumption, as, in that case, it would not be a sufficient safeguard to provide an establishment merely to see that the salt was actually mixed with the lye.

2. From the reports received from the Local Governments consulted it appears that salt is used at two stages in the manufacture of soap; first, for supplying the soda which contributes to the formation of the soapy matter, and, secondly, for separating the soap from the lye. In the former case, decomposition takes place, and it would therefore seem to be feasible to arrange for the issue of duty-free salt by simply ensuring the mixture of the salt with the lye in the course of manufacture. In the case of salt used in the process of separation, the Chemical Examiners consulted are unanimously of opinion that it would always be possible to recover the salt from the 'spent lye' remaining after the separation of the soap, but it also appears that the process of extraction would be neither easy nor cheap. As a precaution against such extraction, the Collector of Salt Revenue, Bombay, recommends that all spent lye, or salt charged liquor, leaving the soap-works should be run to waste, and the Chemical Examiner, Madras, suggests that manufacturers may be required to discharge the spent lye into the sea or a large river or other suitable channel.

3. In Bombay, the Collector of Salt Revenue does not recommend the grant of free salt to the Bombay Steam Soap and Candle Works Company for the manufacture of soap, except on condition that the Company should agree to allow the spent lye to run to waste, that its premises should be open at all times to the Preventive Officers of the Salt Department, that notice of each boiling should be duly given to those officers, that the Company should use fully taxed salt in the first instance, and that after ascertaining the actual quantity of salt required in the preparation of a given quantity of soap, a refund of the duty should be made to the Company, proportionate to the amount of soap sold as shown by its books and vouchers. The Government of Bombay, however, considers it inexpedient to grant the concession, as in its

opinion it would be difficult to prevent loss of revenue from the subsequent illicit use of the salt, unless a preventive establishment is maintained at a strength and cost which would counterbalance any pecuniary gain to be derived by the Company from the use of free salt.

4. In the North-Western Provinces and Oudh, the only factory using salt in the manufacture of soap is the North-West Soap Company at Meerut. In order to avail itself of the privilege of using duty-free salt for soap-making, this Company is willing to give a pecuniary guarantee, to conform to all reasonable requirements of the Salt Department as to the safe custody and issue of the salt, and to allow inspection of its books, &c., but hopes that no expensive preventive establishment will be insisted upon. The Commissioner of Northern India Salt Revenue, on the other hand, considers that a preventive establishment cannot be safely dispensed with. He does not apprehend any danger to the revenue from the separation of salt from the spent lye, but considers that the real risk of loss lies in the fact that a portion of the free salt may never be added to the lye at all, and to guard against this contingency, the location at the works of a preventive establishment is necessary in order to supervise the use of the salt and the disposal of the refuse. The Government of the North-Western Provinces and Oudh thinks that a preventive establishment should not be insisted upon, as the grant of free salt would probably be neutralised by the cost of such establishment and the inconvenience which it would cause to the manufacturers. His Honour the Lieutenant-Governor accordingly suggests that the Commissioner of Northern India Salt Revenue should draw up rules for the safe custody and issue of the salt and for keeping up registers by the manufacturers which should be open at all times for inspection, showing how the salt is disposed of. He also suggests that the Company might further be required to execute a bond in a reasonable amount pledging itself to abide by these rules and to guarantee that all duty-free salt supplied to it should be used *bona fide* in the manufacture of soap and for no other purpose, and power might be reserved in the bond to impose a preventive establishment if there be reason to suppose that the concession is being abused.

5. The Chemical Examiner to the Bengal Government is of opinion that the salt mixed with the lye in the manufacture of soap can afterwards be separated from the lye by repeated re-crystallizations, but that the process would be an expensive one, and could only be profitably carried out on a large scale. The Government of Bengal therefore believes that there would be no danger to the revenue from this source, and that the abuse of the privilege of using duty-free salt might be sufficiently guarded against by the deputation of an officer to the soap-works, whenever required, in order to supervise the mixing of the salt with the lye. It adds that under such an arrangement it would not be necessary to require the manufacturers to pay the cost of a fixed preventive establishment. The Board of Revenue, Lower Provinces, suggests an alternative proposal, *viz.*, that if it can be ascertained approximately what minimum quantity of salt must be used for the manufacture of a certain quantity of soap, an officer might be sent from time to time to examine the outturn of soap manufactured and to note the quantity of salt expended for the purpose, and then a refund of the duty on the recorded quantity of salt might be granted. His Honour the Lieutenant-Governor considers that this procedure might be introduced with advantage if the conditions of soap manufacture admit of a calculation of this nature.

6. The Commissioner of Salt Revenue, Madras, is of opinion that if duty-free salt for the manufacture of soap be issued only to firms of respectability and under adequate guarantees, there should not be any such danger to the revenue as to render it advisable to withhold a concession which might encourage a useful industry. The Board of Revenue, Madras, considers that the difficulties attending the supply of free salt for the purpose of soap-making are not of such a nature as to be insurmountable, and it proposes that, as a tentative measure, the concession may at first be limited to well-known firms, a preventive establishment being maintained to check illicit practices. The Madras Government approves of this proposal subject to the precaution suggested by the Chemical Examiner, *viz.*, that the manufacturers should be required to discharge the refuse salted lye into the sea, or a river, or other suitable channel, and observes that as the manufacturers must bear the cost of the necessary preventive

establishment, the arrangement would be practicable only where the works are conducted on a scale sufficiently large to earn a profit after defraying all incidental charges. It also forwards a letter from Messrs. Arbuthnot & Co., of Madras, applying for the supply of duty-free salt for the manufacture of alkali and suggesting two alternative courses in which the concession might safely be granted, *viz.*, (1) that salt at usual selling rates, *minus* the charge for duty, may be issued to the firm and a trustworthy official retained at the alkali works to see that the salt is not used for any other purpose than that of manufacture, or (2) that the firm may at first buy salt at the ordinary rates inclusive of duty, and afterwards receive a refund or drawback of the duty, on production of a certificate from some Government official retained at the works in order to watch that the specified quantity of salt has been actually employed in the manufacture.

RESOLUTION.—The Governor General in Council observes that the question of the issue of salt, free of duty, to be used in the manufacture of soap and alkali is becoming one of some importance, and on a consideration of the views and proposals set forth in the preceding paragraphs, His Excellency in Council is strongly in favour of an attempt being made to issue duty-free salt for these purposes under proper restrictions and with suitable precautions. His Excellency in Council believes that precautions which will sufficiently protect the revenue can be taken at a moderate cost. Each Local Government is accordingly empowered to make such arrangements as it may deem necessary for the purpose indicated. The arrangements should be made subject to the final decision of the Government of India, to whom they should be reported. In all provinces to which the jurisdiction of the Commissioner of Northern India Salt Revenue extends, the arrangements should be made by the Local Government in communication with the Commissioner. It must be understood that the manufacturer is to bear any extra cost for preventive establishments, &c., which the grant of the concession may necessitate, and that the privilege is liable to be withdrawn if experience shows that it is being abused or that the revenue is suffering.

ORDER.—Ordered, that a copy of the above Resolution be communicated to the several Local Governments and Administrations for information and guidance, and to the Commissioner, Northern India Salt Revenue.

Ordered also, that the Resolution be published in the *Gazette of India*.
